

## An aerial photograph showing a flooded landscape. A multi-lane road runs diagonally across the lower half of the image. Several vehicles are on the road, including a red semi-truck, a white semi-truck, a red car, a white car, a white van, and a yellow tractor. The road is flanked by dense green trees and vegetation. In the upper half of the image, there are several buildings, including a large white warehouse-like structure and a smaller building with a brown roof. The surrounding area is heavily flooded with brown water, and some trees are partially submerged.

**Operational Period:** Starting: 08:00 / 31 Aug 16  
Ending: 08:00 / 01 Sept 16

<b>NRC</b>	<b>800-424-8802</b>
<b>Louisiana State Police (LSP)</b>	<b>225-925-6595</b>

<b>1. Incident Name</b>  2016 August Flood	<b>2. Operational Period</b> <b>Date / Time</b> From: 08/31/2016 / 08:00 To: 09/01/2016 / 08:00	<b>INCIDENT OBJECTIVES</b>  <b>ICS 202</b>				
<b>3. Incident Objective(s)</b> 1. Ensure health and safety of responders and the public by conducting operations in accordance with the approved site safety plan. 2. Monitor debris activities at landfills 3. Continue to respond to complaints/concerns from citizens						
<b>4. Operational Period Command Emphasis (Priorities, Key Decisions for Operational Period)</b> 1. Complete detailed 214s as required, but it is not necessary to submit them to IC at the end of every day. 2. Develop plan for appropriate ICP staff; evaluate and provide appropriate "right sizing" of the organization to correlate with operational needs. 3. Do not put any photographs of flooding and damage on <b>ANY</b> type of social media. 4. The Incident Command main phone number is (225) 219-1221.						
<b>5. Weather Forecast</b>  Wednesday -10 % Precip. / 0 in Sunny, along with a few afternoon clouds. High 94F. Winds NNE at 5 to 10 mph. Thursday -10 % Precip. / 0 in Generally sunny despite a few afternoon clouds. High near 95F. Winds N at 5 to 10 mph.						
<b>6. Safety Objectives</b> 1. <b>Staph infections</b> – due to recent outbreak of severe bacterial infections, all persistent rashes and/or swelling around cuts/abrasions must be reported to the Site Safety Officer. 2. <b>Driving</b> – Be aware of when driving since contractors are coming here to work from other states that are not familiar with Louisiana area roadways. Also be aware that in many areas, red lights are not functioning. Please use appropriate caution when approaching an intersection where this is the case. 3. <b>Road Hazards</b> - Trucks are loaded with debris and may not have the appropriate covering to prevent falling out during transport. Be alert, keep your distances, follow the laws, and drive safely. 4. <b>Debris Hazards</b> - Use a tool first when disturbing debris or overturning containers, and never use your hands. If needed, wear snake chaps during any operation with the potential to encounter snakes. If bitten or stung, seek medical assistance immediately, even if you're certain it wasn't a poisonous species. 5. <b>Reporting Injuries</b> – it is very crucial to report all injuries to your Supervisor or Safety Officer.

<b>IAP SAFETY ANALYSIS</b>	<b>ICS 215a</b>
----------------------------	-----------------

The Department is transitioning from search & rescue mode to recovery. During the current operational period the focus will be on Rapid Needs Assessment (RNA), water reconnaissance, and telephone notifications. Personal operating in the field should be aware of ongoing high water risks in many areas. Also, the potential exists for contact with dangerous wildlife (poisonous snakes, alligators, fire ants, etc.) Typical afternoon thunderstorms have the potential for frequent cloud to ground lighting, seek shelter with approaching storms. All staff has Stop Work Authority if the work situation presents unnecessary or undue hazards. As always, report all injuries to the Safety Officer, then clean and disinfect as soon as possible. Be aware of any heavy equipment operating in your immediate vicinity and be sure that heavy equipment operators are aware of your presence by waving and wearing high visibility vests. Tetanus immunizations need to be up to date for all field inspectors. Please contact Annette Sharp for more information. If you come into contact with any barrels that are bulging at the ends or are hissing or whistling because of a pressure release, DO NOT touch them, and immediately evacuate to a safe distance.

# Safety Message

**2016 August Flood**

**Operational Period:** 08/31/2016/ 0800  
09/01/2016/ 0800

**Major Hazards and Risk:**

*Defensive Driving, Road Washouts, Debris/Sampling, Electrical hazards, Security, Fatigue, PPE, Heat, Animals*

**Tetanus Immunization** – Inspectors going out into the field should be up to date on their immunizations. Please contact Annette Sharpe for more information including verification of immunization, and region-specific information including contacts and location of medical facilities.

**Heavy Equipment Awareness** – Please be aware of any heavy equipment working in your vicinity, and be sure heavy equipment operators are aware of your presence. Be aware of the equipment's range of movement and any reverse warning sirens. Please stand clear of any equipment in use.

**Defensive Driving** - Be alert. Drive with extreme caution. Items of concern are: 1) twisted or bent stop signs and the absence of signs at intersections; 2) road debris such as leaning electrical poles and downed power lines. Be aware of service people working while driving. Be aware of road grade stability caused by flooding and washouts.

**Debris/ Sampling:** Wear Appropriate PPE when entering and exiting debris fields. All field inspectors are reminded to wear high visibility vests during inspections. Be aware of hollow spaces in debris fields. Exercise caution during tree trimming to avoid lacerations. Be aware of potential conditions for fire and explosions. If you are on landfill assessment duty, always check the condition of your vehicles before leaving the facility and getting back on the highway. During field inspections, inspectors may come into contact with barrels on site. If barrels have bulging lids, or are hissing or whistling due to a release of internal pressure, DO NOT TOUCH, back away to a safe distance and report the location immediately.

**Fatigue:** Know your limitations. Watch for signs of fatigue, mental confusion, slower physical and mental reaction times. Be aware of items around you can potentially cause slips, trips or falls. Be sure to get proper rest before extended field activities.

**PPE/First Aid:** Personal protective equipment is the first line of defense against injury or potential exposures. All field work requires the minimum of Level D protection. Dust masks are available for inspectors if needed. First aid supplies are available if needed, please determine if they are needed before leaving your office to conduct inspections. You can obtain these items at the incident Command Center, or at your regional office.

**Wild Animals** – Please beware that wild animals and insects are being displaced by raising flood waters. Do not approach any wild animals. Be aware of snakes, alligators, black bear, raccoon, possums, armadillos, deer, ants, and other stinging insects.

**Mosquitoes:** WEAR INSECT REPELLANT.

**Hydrate/Heat:** Stay hydrated. Remember to drink plenty of fluids. Always bring water or fluids with you since many facilities have suffered damage and are not open or are without power at this time. Apply sunscreen to exposed skin during prolonged outdoor activities.

**Weather Forecast:** Be aware of potential lightning hazards associated with thunderstorms

Wednesday August 31: Sunny, along with a few afternoon clouds. High 94F. Winds NNE at 5 to 10 mph.

Thursday September 1: Generally sunny despite a few afternoon clouds. High near 95F. Winds N at 5 to 10 mph.

*Some parishes are still experiencing flooding from this event. Please be aware of driving conditions for yourself and the other driver who could hit you if they missed seeing the downed or twisted STOP sign at that intersection. You could be totally right and have the right away and still end up in the hospital. Drive defensively.*

***Avoid driving through flooded areas. Remember....Two feet of rushing water can carry away most vehicles including trucks/pickups. Turn around and don't drown.***

Tommy Doran (225) 219-1221 Incident Command Center - HQ  
LDEQ Safety Officer (225) 938-0086 Cell
